

## **Gardening Group**

A group of enthusiastic students meet on Wednesdays to work in our garden. We grow in season vegetables. These are used for our lunchtime 'healthy sandwich orders' or in the Cooking room. Some are just for snacking on!

Strawberries, herbs and lemons are grown and we have planted a passionfruit vine as well as a fig and feijoa trees.

Students learn about weeds and weeding, medicinal plants, planting, composting and soil health. There are swan plants which provide students a living example of the life cycle of the Monarch Butterfly.
